After James and Catherine had a child, things could not get worse for the purity of the project when Catherine died and James decided to abandon the project to keep her child safe. Madison, the Lone Wanderer, and some other staff escape and eventually reach the Citadel. Bugs PC Playstation 4 If the player convinces Li to join the Brotherhood, but then destroys the Institute and the Brotherhood, along with the Prydwen and the airport, Li may be found standing in the burned housing of the Prydwen, using his BoS outfit and acting as if he never left the Institute and Survivor Sole was made his director. [verified] Gallery References 1 Institute Terminals - Dr. Li 1 Madison Li: "I have originally left the Brotherhood because I was tired of being stepped and used. In Fallout 4, Dr. Li won't be hostile when the Institute's staff are attacked, as long as he's not attacked. Other Interactions If the Lone Wanderer passes a speech check before going to Project Purity, Dr. Li rewards them with five chuches. Even if it's allowed it to be activated, they wanted to control it. Knowing this information, she fled to find the Institute, the only safe haven she could think of. However, killing her will turn Brotherhood hostile towards the player character even if they sided with the Brotherhood at the end. Fallout 4 Interactions overview Quests Institutionalized: Father sends the Sole Survivor to speak to the Division Heads, including Doctor Li. She then installs a courser chip in the Sole Survivor's Pip-Boy, allowing them to use Institute teleportation. When your mother was killed, Doctor Li was filled with remorse, but when the player's father decided to abandon Project Purity to keep his child safe, her sadness was replaced with a powerful sense of betrayal. After escaping to the Citadel, Dr. Li will be unavailable for conversation as she asks the Lone Wanderer to leave her alone. Along with several other scientists, they head for the Jefferson Memorial, the location of Project Purity. This sometimes results in NPCs appearing at her door fruitlessly attempting to gain access to the open bod, or spawning in her room during their assigned sleeping hours (trapping them inside). Dr. Li is the first distinct face that the player character sees, during the birthing scene, as she carries the newborn Lone Wanderer away while Catherine is going into cardiac arrest. The Brotherhood and the other scientists also left, and Project Purity was put on hold. One day, having enough of it all, Pinkerton left Rivet City and began to live in the bow of the ship. One can give her "Brian Virgil personal log 0176" in order to convince her to leave the Institute. Super mutant attacks were more frequent and purifying water on a large scale was much harder than first thought. Turned my work into a weapon of war. In addition, he tells the two that the project control room is irradiated lethally, but still needs to be activated rarely or the installation would exploit. Liberty Reprimed: Survor Sole will help Dr. Li and Proctor Ingram in his mission to rebuild Liberty Prime, gathering the necessary materials for the reactivation of the robot. But that was not enough. Madison hid the growing feelings of her Romantic of her by James, respecting her marriage to Catherine. [No-Canon 1] The project was going without problems and even had the support and help of the steel brotherhood, but soon everything collapsed. Notes Dr. Li has a unique hairstyle that is not used by any other NPC, as Cherry does. He tried to recruit Dr. Li in his efforts to reactivate the purity of the project, but refused, thinking that it had been too long. Other examples are Harold, Arthur Maxson or Maccready. Effects of the player's actions If the Lone Wanderer has killed Three Dog before completing the galaxy news radio mission, the player's character will have to talk to Dr. Li to resume the plot. Inventory Fallout 3 Fallout 4 Fallout Shelter Outfitexpert Lab Coatweapon? While Lyons had allowed him to get out of her without being vinty, there were others who created her a safety risk. When she escaped from the institute several months ago, he was declared dead and his laboratory closed against Madison's insistence on an exhaustive investigation. The Brotherhood remained in the capital Wasteland with a great military presence, something with which Li disagreed, believing that with the purity of the activated project and the destroyed enclave, the brotherhood no longer needed to remain. [3] However, the true reason why Madison fled to the Commonwealth was that she took her own life. At 2287, she is in the Commonwealth working for the institute as head of her advanced systems. Unlike Cherry, however, his hairstyle, "The Sophisticate", can beFor the player character if they are women. Madison once more is working on the purity of the project and begins to help his scientific partners to repair the installation to the operational level once more. plus.
